**DIVISION OF WATER RIGHTS**

**ORDER**

Application 11588B Permit 6729 License 3374B

**ORDER ALLOWING CHANGE IN PLACE OF USE  
AND AMENDING LICENSE**

**WHEREAS:**

1. License 3374B was issued to Darwin Grimes and Nita Grimes and was recorded with the County Recorder of El Dorado County on September 28, 1982 in Book 2108, Page 489.
2. License 3374B was subsequently assigned to Frederick R. McLaren and Catharine McLaren.
3. A petition for change in place of use has been filed with the State Water Resources Control Board (SWRCB) and said SWRCB has determined that good cause for such change has been shown.
4. The SWRCB has determined that the requested change does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.
5. The license condition pertaining to the SWRCB's continuing authority should be replaced with the current version to conform with Section 780(a), Title 23 of the California Code of Regulations.

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The place of use under this license shall be 58 acres net within a gross area of 78.8 acres and described as follows:

45.8 acres, within the SE $\frac{1}{4}$  of Section 12, T10N, R9E, MDB&M.

33.0 acres, within the NE $\frac{1}{4}$  of Section 13, T10N, R9E, MDB&M.

as shown on map on file with the SWRCB.

(0000004)

2. The license condition pertaining to the SWRCB's continuing authority is replaced with the following to conform with Section 780(a), Title 23 of the California Code of Regulations.

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected

parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)
